Accreditation Valid to:	2025-04-01

Additional Fixed Office Locations:

Refer to the legal entity location identified at the top of this listing. There are no additional locations included in this scope of accreditation:

Certification Mark:

Product Certification Scheme:

ISO/IEC 17067, Conformity assessment - Fundamentals of product certification and guidelines for product certification schemes, *scheme type 4* most closely resembles the product certification scheme operated by this organization. The surveillance part of this scheme allows for the choice between periodically taking samples of the product from the point of production, or from the market, or from both, and subjecting them to determination activities to check that items produced subsequent to the initial attestation fulfil the specified requirements. The surveillance includes periodic assessment of the production process. This scheme can both indicate the impact of the distribution channel on conformity and provide a pre-market mechanism to identify and resolve serious nonconformities. Significant duplication of effort may take place for those products whose conformity is not affected during the distribution process.

Note: The Transport Canada ELD certification scheme in this program does not include periodic assessment of the production process.

Scope of Accreditation:

The scope of accreditation for the above-mentioned legal entity limits the use of the certification mark shown, to products that meet standards classified by the following international classification coding:

Additional Regulatory Requirements:

Title	Purpose
Transport Canada Electronic Logging Devices	Performance

This document forms part of the Certificate of Accreditation issued by the Standards Council of Canada (SCC) to FPIInnovations. The original version is available in the Directory of Accredited Product, Process and Service Certification Bodies on the SCC website at www.scc-ccn.ca.
