The laboratory's activities also include the modification, improvement and evaluation of standardized, published or existing test methods for the program areas listed below.

Techniques for which the laboratory is accredited:

- Liquid chromatography (LC) with multiple detectors: UV-Visible (DAD), fluorescence (FLD), refractive index (RID), mass spectrometry (MS/MS and HRMS)
- Gas chromatography (GC) with flame ionization detection (FID)
- Inductively coupled plasma mass spectrometry (ICP-MS), ELISA, PCR, near field infrared spectroscopy, spectrophotometry, spectrofluorometry, combustion, volumetry, titrimetry and et gravimetry
